

Noorulain Irshad

CSE 20

9/17/2019

Interview Questions:

1. What would you do to calm conflict within your team?
2. What are some examples of previous projects you've worked on?
3. Provide examples of coding that you think would be needed for everyday work.
4. When do you think it's appropriate to ask for outside help when learning a new subject?
5. Where do you see yourself in five years?

Questions for Teachers/TAs:

I would ask different questions to my professors and TAs because I know that they are in a more education-specified area of work. So, I would ask them why they believe they are qualified to teach others.

Questions for students:

I would ask students questions that help me understand the scope of their knowledge involving code because I am in a beginner's class, and not everybody is at the same baseline understanding.
